## ***Description of A-TABLE***

**General Description.** The A-TABLE contains basic data assembled since June, 2015, on all NHS graduates from the first class in 1903 to the last class in 1961. It is sorted chronologically by class (year of graduation) in column 1 and sorted alphabetically by last names within each class in column 2. For married women, the married name is used followed by first name, middle and maiden.

**There are 494 NHS graduates but only 493 NHS alumni.** That is because one alumnus graduated in two different classes. Lloyd H. Mills graduated from the 3-year curriculum in 1923 and then returned to earn the new 4-year diploma with the 1926 class. Prior to adoption of the 4-year curriculum in 1925, some NHS graduates would take their fourth year of high school at West Liberty High School or Muscatine High School to earn a 4-year diploma.

**99 Living Alumni.** The 493 alumni of Nichols High School presently [February 23, 2021] consist of 394 deceased alumni and 99 living alumni. The 493 alumni consist of 257 women and 236 men.

**Online Memorial Pages.** Every deceased alumnus has a memorial page on the web site known as **findagrave.com**. Every 9-digit number appearing in column 3 (**FINDAGRAVE**) is the identification number for that person's memorial page. The memorial page identification numbers are live links that you need only click on to display on your web browser the memorial page of any and all deceased NHS alumni. For the 394 deceased alumni, if there was no cemetery burial, that fact is indicated in column 5 by (Cremated), (Research) or (Unknown) and in those cases column 6 is the state in which the person died.

**Date Format.** Column 4 shows the date of death of each deceased alumnus. A computer friendly date format is used of **YEAR.MODA**. For example, December 7, 1941, appears as 1941.1207.

### **Notation**

The two persons listed below were erroneously included as NHS graduates In the 1984 Nichols Iowa Centennial Book.
